IBM Mag Card II - A - "Selectric" - "Executive" Typewriter
IBM 6240 Mag Card Typewriter - IBM Mag Card Composer
IBM Electronic "Selectric" Composer - Memory Typewriter

Preface

This Part Number Manual (PNM) is primarily intended for use by IBM Service Representatives. This manual provides parts information to help in servicing the specific machines indicated and should be used with the Parts Catalog and the Parts Price List (PPL) form number SR28-0259.

Seventh Edition (March 1983)

It is possible that this material may contain reference to, or information about, IBM products (machines and programs), programming, or services that are not announced in your country. Such reference or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country.

Publications are not stocked at the address given below. Requests for IBM publications should be made to your IBM representative or to the IBM branch office serving your locality.

A form for reader's comments is provided at the back of this publication. If the form has been removed, comments may be addressed to IBM Corporation, CSD Service Planning, Dept. 85C/996, 11400 Burnet Road, Austin, Texas, U.S.A., 78758. IBM may use or distribute whatever information you supply in any way it believes appropriate without incurring any obligation to you.

Information for Customers
Sale of IBM Parts

The purpose of this section is to acquaint customers with IBM's current practices, which may change from time to time, regarding the sale of IBM parts. Requests for additional information or any questions concerning the provisions of this section should be referred to the local IBM branch office.

Definition

A standard maintenance part is any repair or replacement part authorized for use by IBM service representatives in the field for maintenance purposes.

General

IBM plans and maintains inventories of parts for the manufacture, maintenance and support of its products. IBM is not in the parts business as such. Due to such things as patent restrictions and the need to ensure continuing parts availability, the sale of IBM parts is limited, as follows–

Available for Sale:

IBM sells parts, in reasonable quantities, for use by others in support of IBM products. This includes standard maintenance parts, tools, test equipment and supplies used by IBM service representatives for field maintenance of IBM machines.

In addition to selling parts for the maintenance of IBM products, IBM sells parts for the following purposes:

a) parts, assemblies and appearance items used for reconditioning, rebuilding, or repairing damage of IBM machines;

b) parts used for installation, removal and reinstallation of IBM features and model conversions on IBM machines;

c) parts used for restoration of altered IBM machines; and

d) parts defined by IBM to interface other manufacturers' equipment to an IBM defined multiple machine interface on an IBM machine.

Not Available for Sale:

Items generally not available for sale include parts, assemblies, subassemblies, components or raw materials used by IBM only in its manufacturing operations.

IBM does not sell parts to be used for the support (including manufacturing and maintenance) of non-IBM machines, features, devices or alterations.

IBM does not sell feature and model conversion bills of materials for installation in other than IBM type number machines for which designated.

IBM will continue to make parts available as long as IBM has such parts available for maintenance of its equipment. IBM will fill quantity orders for maintenance parts when there is sufficient supply to permit. In some cases, however, it may be necessary to restrict quantities to those required for immediate maintenance needs to ensure continuing parts availability to all.

Modification and improvements in design may occur at any time and could affect future availability of any part. After the discontinuance of IBM lease and rental and/or withdrawal of IBM maintenance agreement service for a product, orders for parts, in reasonable quantities, will continue to be accepted in the normal manner until existing stocks are depleted.

While IBM sells parts for purposes outlined in the preceding paragraphs, IBM reserves the right not to accept or to cancel orders for parts found to have been intended for other uses such as manufacturing.

Order Acceptance and Processing

Regular Orders:
Orders are to be placed by the customer directly with the IBM Parts Order Center. When placing orders, the customer should allow a minimum of five working days from the date the order is received by IBM for the parts to be shipped from IBM's central distribution locations. Longer periods may be required for certain parts, including, but not limited to, parts not used for standard maintenance purposes by IBM, parts used on an infrequent basis by IBM, or parts which must be obtained from IBM plant locations. If the parts ordered cannot be shipped from IBM's central distribution locations within one month of IBM's receipt of the order, the customer will be notified within one month of order receipt.

Shipment of parts for all regular orders will be made directly to the customer's location. Normal transportation on such orders will be an IBM expense.

Emergency Orders:
In an emergency, an order for standard maintenance parts required for an immediate repair will be accepted at designated IBM parts stations and distribution centers. A handling charge will be applied to any order placed at these locations. When a part is not available at the IBM parts station or distribution center where the customer placed the order, IBM will make a special effort to secure the part in an expedited manner. Parts will only be shipped to the ordering location or to the customer's address.

IBM parts stations and distribution centers are maintained primarily for the purpose of providing maintenance parts for IBM service representatives, and stock levels are based on their requirements. The customer will be responsible for any shipping charges, including any for transportation beyond the order entry location. In instances of unusual delays, the customer will be notified.

A service charge is applied for an emergency order placed outside the regularly scheduled hours of the IBM parts station or distribution center.

Orders Requiring Marketing Assistance:
Certain orders must be submitted in writing to your local IBM marketing branch office. Examples include orders for parts for use by customers and other manufacturers to interface to IBM defined multiple machine interfaces, certain parts determined by IBM to be in limited availability, and orders for IBM features and model conversions.

Limited Warranty

Parts sold by IBM will normally be either new or equivalent to new in performance when properly installed in an IBM machine. If a new or equivalent to new part is not available, and a used part is supplied, the purchaser will be so advised. Parts sold are warranted for three months after delivery to be free from defects in material and workmanship. IBM's obligation is limited to furnishing, on an exchange basis, replacements for parts which have been promptly reported by the purchaser as having been, in the purchaser's opinion, defective and are so found by IBM upon inspection. THIS WARRANTY IS IN LIEU OF ALL OTHERS EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

IN NO EVENT WILL IBM BE LIABLE FOR ANY LOST PROFITS, LOST SAVINGS, OR OTHER CONSEQUENTIAL DAMAGES, EVEN IF IBM HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM AGAINST THE CUSTOMER BY ANY OTHER PARTY. SOME STATES DO NOT ALLOW LIMITATIONS OF AN IMPLIED WARRANTY OR THE EXCLUSION OR LIMITATION OF CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO THE CUSTOMER. THIS WARRANTY GIVES THE CUSTOMER SPECIFIC LEGAL RIGHTS, AND THE CUSTOMER MAY ALSO HAVE OTHER RIGHTS WHICH MAY VARY FROM STATE TO STATE.

Returns

All parts sales are final, subject to existing warranty provisions. Returns will be accepted in accordance with such warranty provisions or within one month of date of purchase for those parts which are unused, and through mutual agreement it is determined that the:

- incorrect part/quantity was ordered as the result of decimal error, transposed digits, part name/number mismatch, adjacent parts catalog line items, EC level or machine configuration;
- part/quantity furnished did not correspond to the customer order; or
- substitute part furnished does not meet customer needs.

Return of parts ordered or provided in error will be accepted at the IBM parts location where the order was placed, concurrently with sale of the correct part(s). Acceptance of the returned part(s) will be contingent upon presentation of invoices, purchase orders, etc., which substantiate the original transactions, and for a part ordered or provided in error, the accompanying purchase of the correct part.

Prices

Prices are subject to change without notice. Parts will be invoiced at the lower of either the selling price quoted, if the order is placed within one month of a written quotation, or the price in effect at the time of shipment. Price increases will apply to parts ordered prior to, but requested by the purchaser to be shipped more than two months after, the effective date of the increase.

PART NUMBER MANUAL (PNM) INSTRUCTIONS

This PNM is used with APM S241-5992 and Parts Price List (PPL) SR28-0259. The PPL will contain all part numbers and their current prices listed in this manual. Part numbers not listed in this manual may be listed in current CEMs.

Parts information contained is for the following products:

Equipment Description	Machine Type
IBM Memory Typewriter	6128
IBM 6210 Pluggable Loop	6210
Audio Typing Unit	6208
Mag Card "Selectric" Typewriter	6610
Mag Card "Executive" Typewriter	6614
IBM Mag Card II Typewriter	6616
Reversible Mag Card "Executive" Typewriter	6618
IBM Mag Card/A Typewriter	6620
IBM 6240 Mag Card Typewriter	6211
IBM Transcribing Mag Card Typewriter	6672
Electronic "Selectric" Composer	6375

SPECIAL PART NUMBER IDENTIFICATION

Part numbers with a code printed in the description column provide footnotes.

Code	Additional Information
1	Refers to a note at the end of the Mechanism list. Machine serial numbers are approximate.

Part numbers with a code printed to the right of the description provide additional information for ordering, identifying or locating parts.

Code	Additional Information
A	Specify color
C	Typestyle, character, position, catalog number
E	Typestyle, keyboard arrangement, number of characters, machine model
G	Specify forms width
H	Pin-to-pin dimension and hardness
WT	World Trade Part
B4	Japanese Series III
T	Supplies or accessory items
S	Specify length in feet

Parts Packet Parts – Part numbers that are also contained in Parts Packets are identified by a two-digit number printed on the right of the description that corresponds with the last two digits of the Parts Packet Part Number. Complete Parts Packet Part Numbers are listed before the first mechanism code in this publication.

Example: 0332747 Retainer 13
is in packet No. 13 (1152413) also.

CEM INFORMATION

This edition contains part numbers previously printed in CEMs through CEM No. 443.

MISCELLANEOUS EQUIPMENT SPECIFICATION (MES) AND SPECIAL ENGINEERING REQUEST (SER) PARTS INFORMATION

Features, devices, specification changes or replacement parts not shown in the Parts Catalog must be ordered through CSD Management and Branch Office Marketing.

Chart Index

The following charts are contained in the back of this manual.

- World Trade Platen Index and Shims
- World Trade Planar Boards
